

ienia 3-day internal EMS auditor course

Joining Instructions

- Courses usually start at 09:00 and continue no later than 17:00.
- On public courses, refreshments and a choice of lunches are provided as part of the course.
- Delegates are not expected to possess a detailed level of knowledge of EMS and auditing prior to the course. As the audience for this course may vary widely, we would suggest that delegates familiarise themselves with:
 - section 4 of the ISO 14001 standard
 - environmental management within their own organisation
- This is a 40 hour course comprising lectures, exercises, live audit and some homework.
- At the start of days 2 and 3, there will be a brief quiz, going over topics covered the previous day. We would urge delegates to spend about 1 hour in the evening revising the day's work.
- As this is a professional qualification, there is a short test at the end of the course. Whilst the tutor will lead revision during the course, it is recommended that delegates spend some time in the evening revising.
- Delegates are scored on their participation throughout the course, the way that they prepared for and conducted the live audit and feedback and the test.
- The third day includes a live audit. Whilst we can provide necessary PPE, we would ask delegates to bring safety shoes or boots and out-door clothing if they have it.
- Details of the course venue, directions, etc. will be sent to you prior to the course.
- If you have any queries, please contact Southern Consulting at:
